CONTACT

A modern office interior with large windows, orange armchairs, and circular pendant lights. The space is bright and airy, with a focus on natural light and comfortable seating. The windows offer a view of the outside world, and the armchairs provide a cozy spot for relaxation or work. The pendant lights add a touch of modern design to the space.

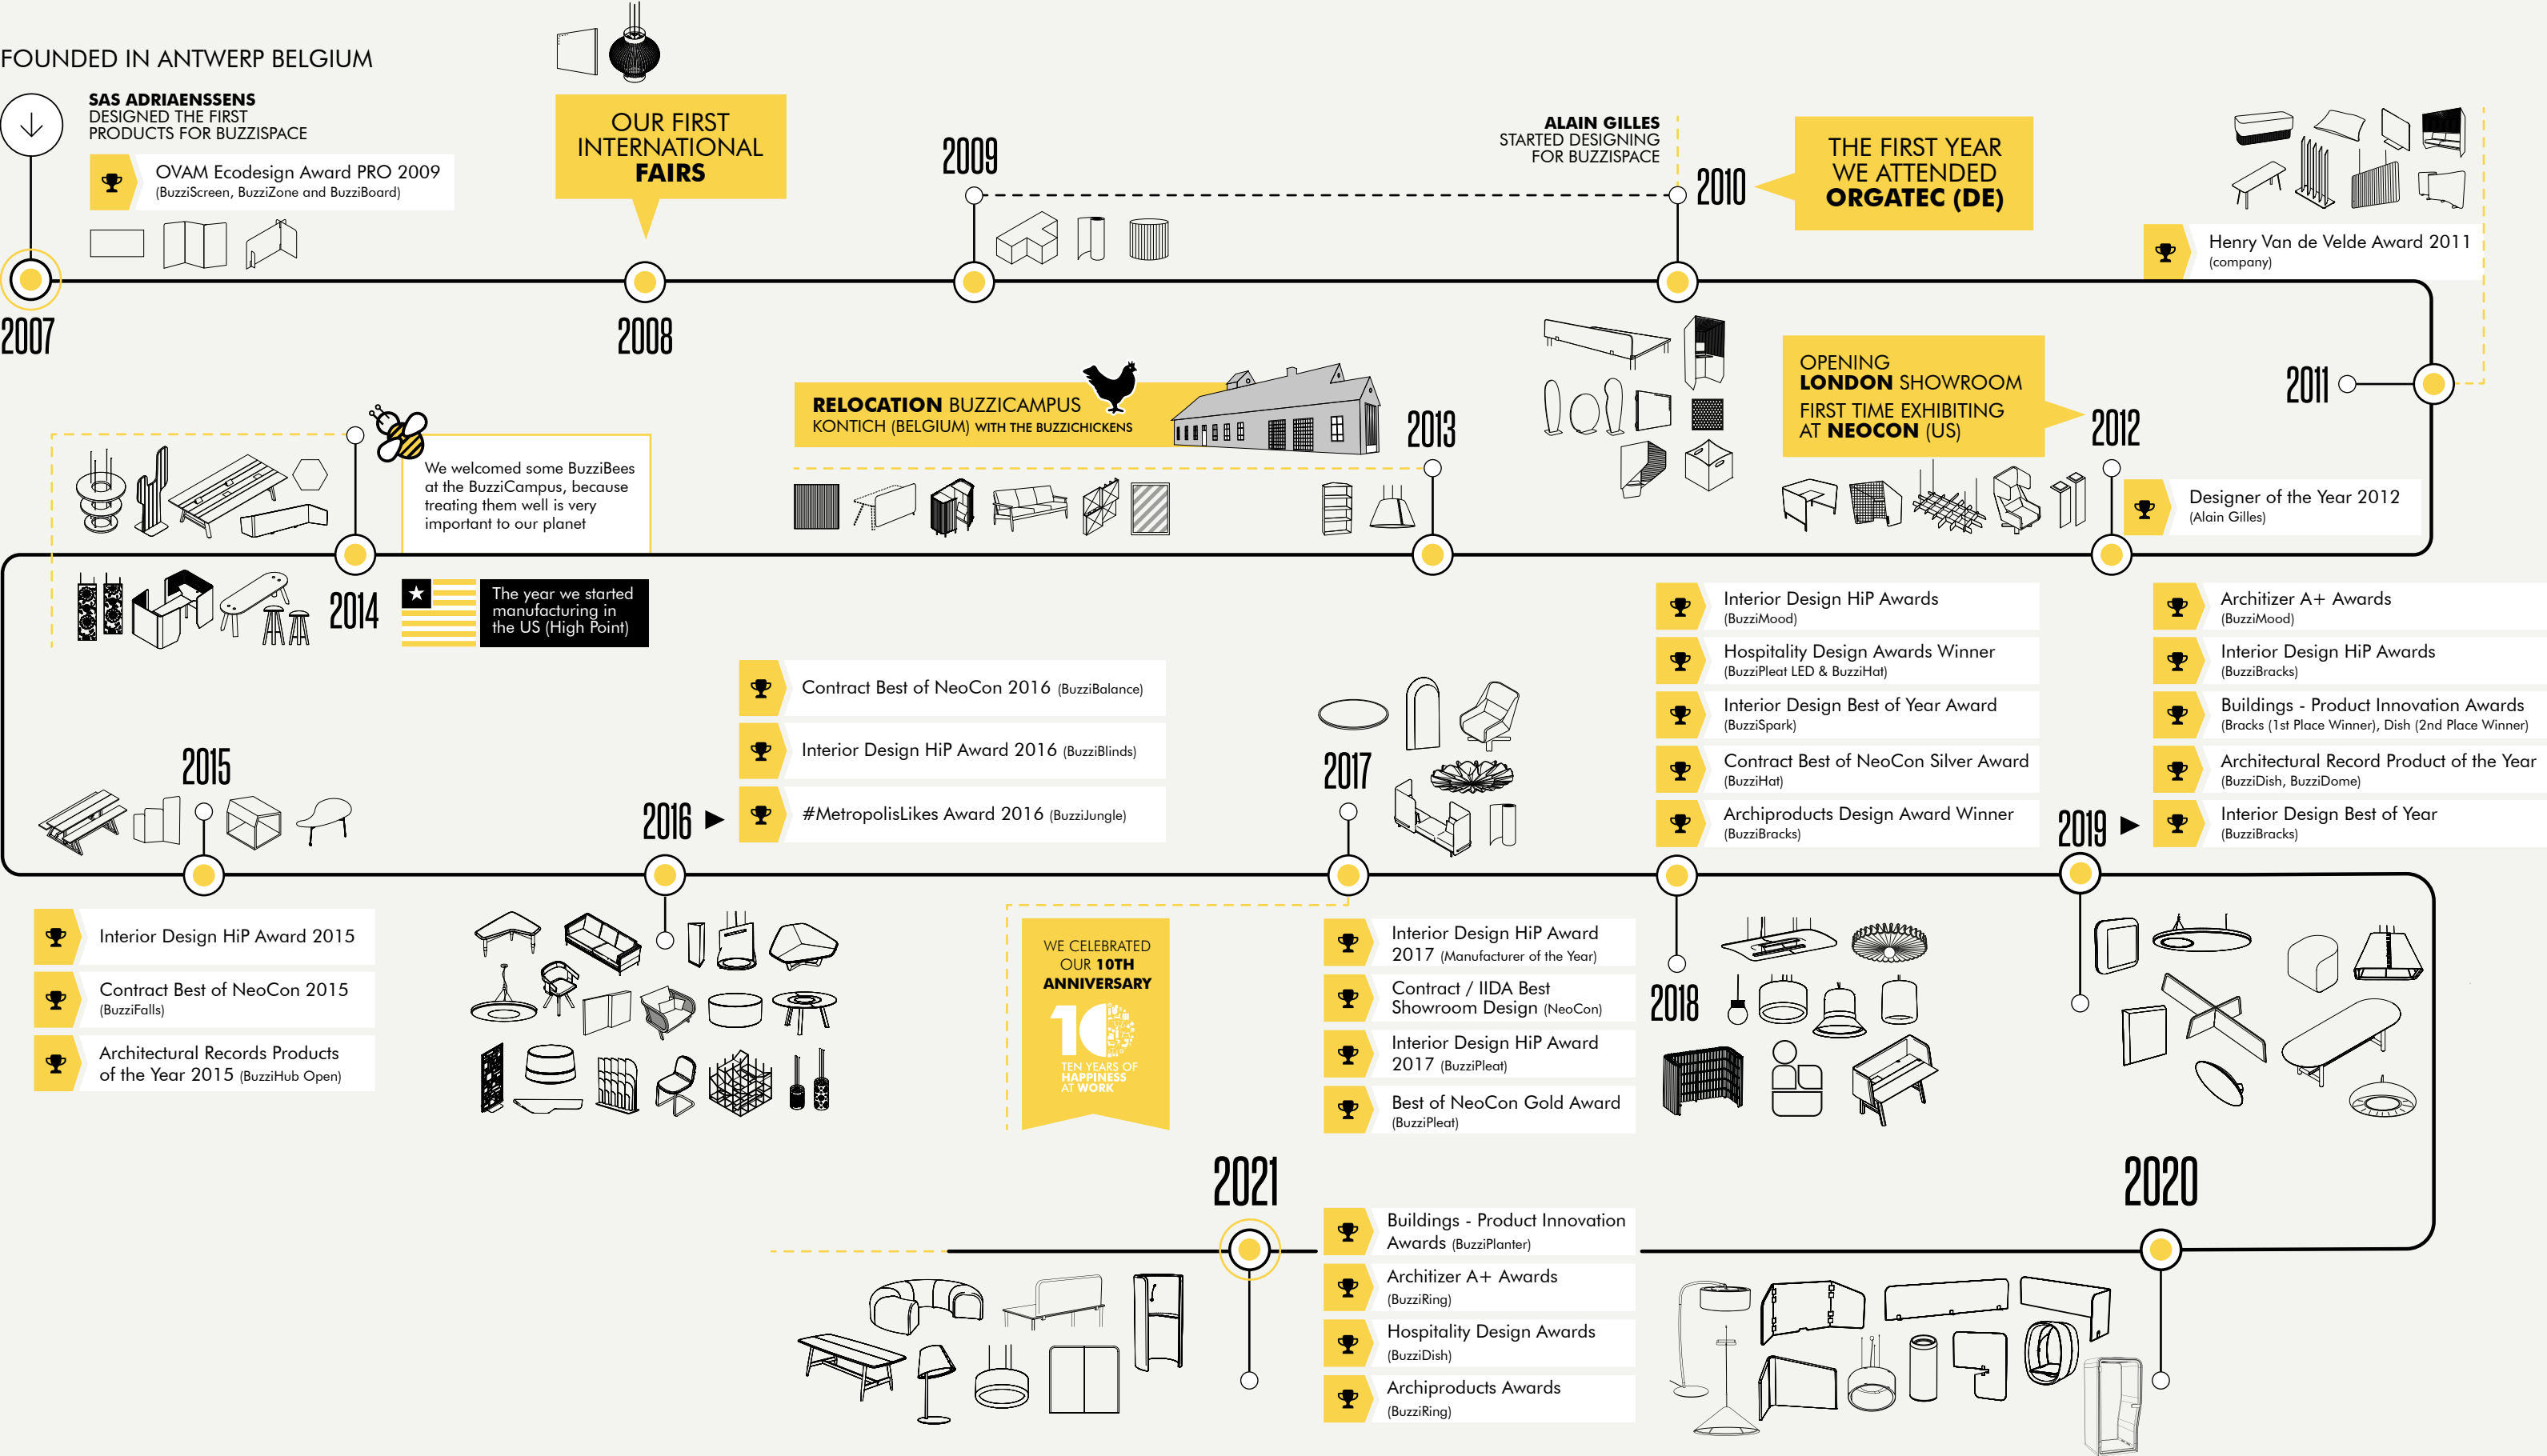

BuzziSpace

— We care about happy and healthy spaces

BuzziSpace creates solutions for happy and healthy workspaces around the world since 2007. Driven by an unbounded passion for solving modern workspace design challenges, we continuously reimagine furniture, lighting and acoustic office solutions. Our in-house studio collaborates with talented designers to provide new ways of working and living—comfortably, collaboratively and sustainably.

Improving the world through design is what drives us every day. This is reflected in numerous design awards and partnerships with well-known designers. With showrooms in Antwerp, New York and Chicago, and our own production site in Bladel (NL), we have firmly established ourselves as a global player, creating happy and healthy workspaces.

Our journey

Local Manufacturing

At heart, we're all makers. We're born that way. Each one of us possesses the skills to create things that will amaze and surprise others, even ourselves. It happens daily at our local manufacturing facility in Bladel (NL) fueled by a shared desire to make durable and high-quality furnishings, both facilities bring out that extra sparkle in every BuzziSpace product that sets the brand apart from the competition.

Local Manufacturing in Bladel

Furniture-making is a tradition that goes back many years in Bladel. The unique characteristic is the ability to create quality products of the highest standards. In fact, the rich legacy of manufacturing furniture in both areas is a major reason why BuzziSpace chose Bladel for its manufacturing location.

Just across the border of Belgium in the Netherlands, you will find our manufacturing facility in Bladel. From the outside, it might look like any other production facility, but on the inside, it is anything but. Welcome to a world of imagination and innovation, a world where ideas are turned into reality - the world of BuzziSpace.

The facility in Bladel houses more than 80 employees across several departments, with more than 100 years of combined experience in foam cutting, upholstery and stitching. A handful of its current workforce was brought on from the last company to occupy the space, a manufacturer of caravan cushions, consequently bringing with them a strong level of expertise in upholstery and foam-work, which has been key to creating several BuzziSpace products.

Despite having an extensive skillset, employees do sometimes face challenges. The truth is, the process of making caravan cushions differs greatly from that of making a BuzziSpace product - the work is more rigorous and complex, and requires a much keener eye for detail.

For example, making a product like BuzziCube 3D involves a particularly complex lamination process. Expertise is required to find the right balance between pressure, temperature and glue, to seamlessly fasten fabric to the 3D cut foam. Every time a new fabric is introduced, our production team has to reevaluate the formula from scratch, so the team is constantly innovating to meet new challenges.

At BuzziSpace, craftsmanship is crucial to guarantee high-quality finished products. In several departments, much of the work is still done by hand, requiring special techniques to achieve the desired result. For instance, lacing and upholstery are some of the departments in which the work necessitates a steady hand and eye for detail. Here, the work is both an art and a skill.

Every year, thousands of meters of fabrics and cubic meters of foam are used to produce BuzziSpace solutions. It's inevitable to avoid any waste materials. With sustainability being one of BuzziSpace's founding pillars, both facilities have implemented recycle management of core materials such as foam, cardboard and fabric.

In Bladel, for instance, foam recycling has proven to be a great success in resourcing old materials and eliminating excess waste.

At BuzziSpace, every employee at the manufacturing facility shared a passion for a shared passion for making products that will solve the modern design challenges of today—and beyond.

“Lacing and upholstery are some of the departments in which the work necessitates a steady hand and eye for detail. Here, the work is both an art and a skill.”

Meet our Designers

BuzziSpace has always given opportunities to both upcoming and established designers to develop products and ideas that match the DNA of BuzziSpace. These designs are often ahead of their time and each tells a unique story. They do not only look good but they also meet a particular need.

Sas Adriaenssens

I don't design with the 'new way of working' in mind, because I believe that people work and live how they want to. It's my role as a designer to listen to their needs and try to give them a personalized solution.

Sas Adriaenssens obtained a master's degree in graphic design and illustration and after several years in marketing, naturally moved into the world of interior and product design. After many years of experience in companies of all shapes and sizes, she went freelance in order to create her own cocktail of creativity and practical organisation. She prefers to describe herself as a 'creative problem-solver with a compulsive aesthetic sense'.

Sas designed the very first products of BuzziSpace, which were made out of ecofelt, a hundred percent recycled material made of old plastic bottles. They were an instant hit and won several awards. BuzziSpace was catapulted into the spotlight and rapidly expanded its range keeping its original philosophy in mind: ecology, flexibility and acoustics.

Alain Gilles

“Design is in the details.”

After studying Political Sciences and Marketing Management, Alain Gilles went on to work in the international financial world for five years, but he decided to follow his passion. Thanks to the moral support of his wife, he went back to study Industrial Design in France. He opened his own studio in 2007 in order to pursue his dreams and develop his personal approach to product design, furniture design, art direction and scenography. In 2012, he was named “Designer of the Year” by the prestigious Interieur Kortrijk Foundation in Belgium.

Alain Gilles started designing for BuzziSpace in 2009 and developed the BuzziHood, an acoustic cocoon you can hang on the wall and a fun reminder of the classic vintage phone booths. Alain's experience with working in a corporate environment for 5 years also helped him understand the needs of open-plan offices, which he incorporated in new product ideas for BuzziSpace. Each of them are groundbreaking products that fit perfectly into the philosophy of BuzziSpace.

13&9 Design

“We encourage interdisciplinarity in every design project. Our different backgrounds give us the flexibility to use unconventional skills in developing new products.

Austrian product design firm 13&9 was founded in 2013 in Graz and is based on the partnership between architect and CEO of INNOCAD Architecture, Martin Lesjak (Contract magazine’s Designer of the Year) and designer Anastasia Su (who also studied medicine). 13&9 is a design studio for international companies and also has its own label that designs, produces and sells their own products. The interdisciplinary team’s successful cooperation with specialist partners has led to achievements in furniture, lighting, floor coverings, fashion, accessories and art objects, as well as exhibition and sound design projects. 13&9 collaborated with BuzziSpace for the first time in 2016 and created the BuzziBalance and BuzziBalance Board. Two pieces that encourage movement and energy—creating a hub of social activity in the office space.

Jonas Van Put

Jonas Van Put is a young Belgian interior architect and furniture designer. He creates monumental steel constructions, furniture and art installations that question and improve social interaction. He is intrigued by nature, landscapes and everything that derives from this. The underlying processes of nature as well as artificial circumstances on different scales fascinate him. The launch of the BuzziJungle introduced the design world to young Belgian talent Jonas Van Put. It was Van Put’s first project with an international manufacturer.

Jeffrey Huyghe

With a background in industrial product design, mechanical engineering, and lighting, Belgian designer Jeffrey Huyghe has a broad understanding of different design disciplines. Architectural lighting was his first love and has only grown bigger throughout the years. This, however, hasn’t stopped the young talent from extending his portfolio to include other designs, for instance, acoustic solutions. Lighting or non-lighting, there’s a common theme, a signature, that unites Jeffrey’s portfolio. Everything rotates. Everything is built to move and to surprise!

BUZZISPACE PRODUCTS

- 2019 BuzziDish

“Everything I create has a spark of magic. Each design holds a moment of surprise while maintaining its original purpose.

Chris Hardy

Chris Hardy is an American industrial designer based in Atlanta. Born in 1984, he pursued an education in design, receiving a BFA from the College for Creative Studies in Detroit and a Masters of Design from the School of Design at the Hong Kong Polytechnic University. After returning to the United States in 2009, he began his career as a freelance designer collaborating with companies for both industrial and graphic design. His clients include interior design firms, retail stores, furniture and lighting manufacturers, and design publications. For the expansion of BuzziSpace’s range of acoustical lighting solutions, Chris Hardy created a distinctive new pendant shape, named BuzziBell, that won an Interior Design HiP Award Honoree at NeoCon 2016.

“I aim to develop pieces that can be connected with on an emotional level. My work is inspired by the challenge of personalization in the modern world and the increasing desire we have to own objects that match our own styles and philosophies.

BUZZISPACE PRODUCTS

- 2016 BuzziBell

“

All our furniture designs share a certain relationship: there is always a link, a kind of visual logic and a magical interplay of relationships. Call it unity in diversity if you will. Conspicuous details give all our designs a distinct identity and catch everyone’s eye.

Gerd Couckhuyt

Belgian designer Gerd Couckhuyt opened his own design studio ‘Bhoom’ in 2012 and was a late bloomer in the design world. At a very young age, he began his career at Bekaert Engineering as a mechanic and later as an electrician. At the age of 18, his interest for interior design was stimulated by a friend who painted. Later he obtained several degrees in art, interior design, light consultancy and sculpture art. The combination of his technical background and his feeling for creation and art makes him a more complete designer with an eye for the visual and the technical aspects. His inspiration comes from daily visual and emotional impulses. Designing objects and interiors is not an assignment for Gerd, but a distillation and fine-tuning of ideas already present in his mind. He now works for several international brands, such as Modular, Wildspirit, Manutti, etc. With his design ‘Elements’ for Manutti he won the prestigious Red Dot Award in 2014.

Cory Grosser

“

As a designer, empathy is crucial. It’s about understanding and transforming how people feel in a space. Of course, functionality is important too, but nothing beats putting a smile on people’s faces.

Cory Grosser + Associates (“CG+A”) is a multi-disciplinary, boutique design agency that implements beautiful design for the benefit of commerce and culture. Founded in 2002 by American designer, Cory Grosser, CG+A’s approach drives creative strategies for brands and engaging narratives for people. The Pasadena-based studio has collaborated with many top American and international brands on projects in the fields of: architectural design, furniture and product design, design strategy and creative direction.

Wiebe Boonstra & Marc van Nederpelt

“

You always remember the man with the scar.

DUM OFFICE is a Dutch design studio founded by designers Wiebe Boonstra and Marc van Nederpelt in the late nineties. The main objective of DUM OFFICE is to provide spaces with distinctive items all with a recognizable DUM signature: edgy, clean, playful, colorful and subtle. BuzziCane fits perfectly in their playful aesthetic signature and in our BuzziSpace DNA. The informal design of the BuzziCane welcomes guests with its friendly feel.

🏆 Architectural Record’s Record Products 2017 in category ‘Best Lighting Products’ (BuzziCane)

“

The big difference between designing today and in the past is that designing now has become teamwork, while it used to be a one-man business. Today there are so many different elements associated with our profession that are very important like for example marketing.

Axel Enthoven

Axel Enthoven (1947) a big name in design land. With his design bureau, Yellow Window (formerly known as Enthoven Associates Design Consultants), he not only designs furniture but also buses, trams, trains or even medical equipment. This Antwerp-based design bureau has already made 1,900 products, and is active worldwide in product development, design consultancy and innovation research. The team has won several awards, including various Red Dot Design Awards and IF Design Awards. For his pioneering work in the design sector, Axel Enthoven received the Henry Van de Velde Award in 2004. For BuzziSpace he designed the BuzziMe in 2012. The ideal lounge chair to get away from it all.

Anthony Duffeleer

“

Designing is the outcome of a process where the role of the designer is seriously relative. The material, the production process and other parameters control the direction and form of our designs.

The Flemish architect Anthony Duffeleer heads the Antwerp-based agency Frap together with architect Freia Rombouts. The duo is specialized in product design and architecture. In addition to this, Duffeleer is the initiator of Xala, a collection of must-haves for house and garden. As a designer he is particularly interested in the quest for the right production method. In 2010, he designed a funky room divider for BuzziSpace, named BuzziPlant.

Stal Collectief

Stal Collectief is a collaboration between four young furniture designers who studied in Mechelen (Belgium): Len de Paepe, Bob Segers, Tim Vranken and Jonas Blondeel. This collective, which occurred through common interest and friendship, wants to create timeless and honest pieces of furniture and lighting objects. New ideas are conceived, prototyped and sometimes even developed under one roof. The BuzziShade, which provides light and absorbs sound at the same time, is the culmination of an artistic collaboration between BuzziSpace and the four young Belgian furniture designers of Stal Collectief.

Jean-Pierre Galeyn

“

We design from the bottom up, creating unique, innovative products appreciated by consumers, concerned by better quality and long-term use.

Jean Pierre Galeyn owns a craft workshop called Tradewinds, where outdoor and garden products are created, assembled and distributed. The art of outdoor living is their main concern, so they reshape widely used and distributed products to restore their authentic purpose and make them lasting, user-friendly and pleasant to the eye. They seek for the perfect blend between authentic craftsmanship and new technology to achieve unique objects.

Silence is Not a Luxury

From the very beginning, acoustics have been a driving force when developing or considering new products. A well-balanced room with a perfect acoustical level is a key factor to the performance and well-being of workers all over the world and therefore our logical main concern. For BuzziSpace, acoustics is more than just a generic word. It's our way of caring for workers and contributing to a pleasant working environment by balancing any given space with the recommended reverberation time and enhancing the speech intelligibility.

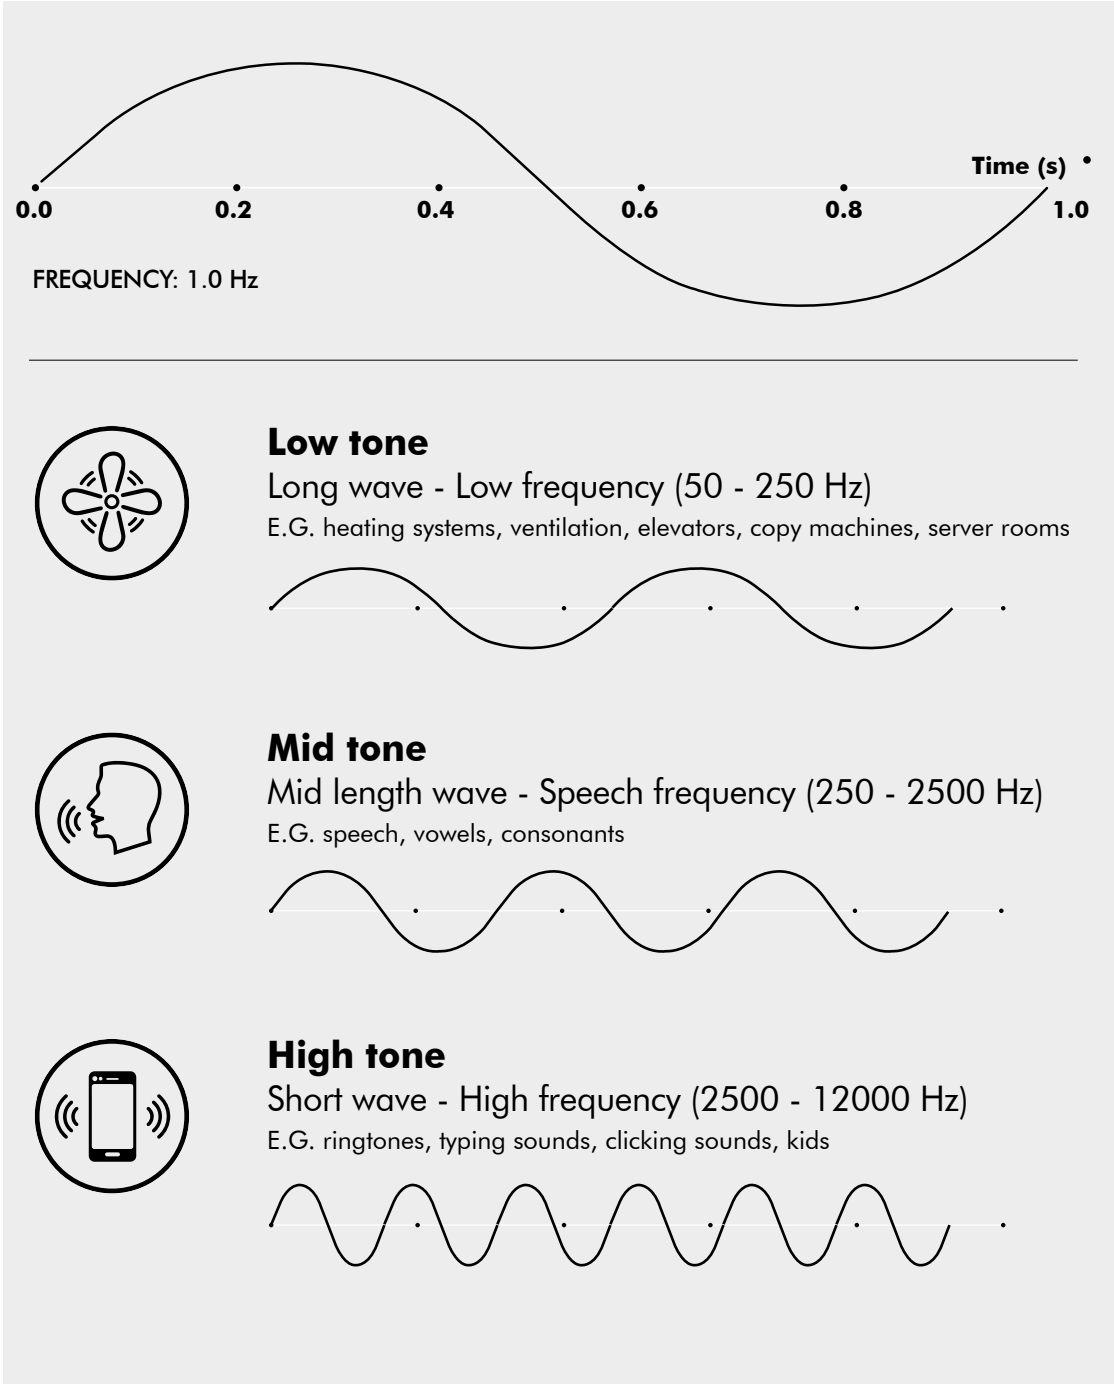

UNDERSTANDING ACOUSTICS

Sound consists of pressure waves running through the air. It can be described as energy, created by vibrations, transmitted through the air or any other medium. The inner ear converts those vibrations into electric signals, which are sent to our brain, where they will be processed and perceived as the actual sound coming in. Consequently, sounds are perceived differently depending on the frequency, intensity (decibel), and reverberation time in a room.

Frequency

The wavelength determines the sound frequency. It is measured as the number of repetitive vibrations per cycle per second and is expressed in Hertz. The audible range of sound is between 20 to 20 000 Hz. The higher the frequency, the higher the tone.

Acoustic Principles

To create a better acoustical environment and reduce reverberation time in a room, BuzziSpace products are developed to perform on one or more of the following acoustic principles.

Absorption
Sound waves are absorbed by any ‘acoustically soft’ material they encounter.

Sound is energy and in order to stop this energy from propagating, absorptive panels will be used to convert this energy into heat through friction. The absorption coefficient of a product will determine the level and quality of absorption. Absorption applies to fixed wall or ceiling elements.

Diffusion
Sound energy is spread evenly in a given space.

Wavelengths which cannot be absorbed through acoustic treatment will scatter evenly back into the room, ensuring a better spread while maintaining a live, vivid sound. This property can be obtained by alternating different depths of absorptive material and 3D shapes.

Attenuation
Reducing the sound transfer within a room.

In order to reduce the sound transfer between different spaces, vertical elements will be applied to cut down sound energy. Those can come in different shapes such as sound blocks, vertical ceiling panels, room dividers and desk screens. Attenuation or sound dampening has a positive impact on speech intelligibility and clarity.

Reverberation time

Reverberation time is the time needed for an original sound source to decay 60 dB and is expressed in seconds. In order to generate excellent speech intelligibility and clarity, the reverberation time should be adjusted and balanced by means of absorptive material in function of the specific acoustical issues in a given space. The recommended reverberation time will always have to be adapted to the room volume and the type of activity.

RECOMMENDED REVERBERATION TIME:		
• Office:	0.75s	
• Meeting room:	0.60s	
• Cafeteria:	1.00s	
• Gymnasium:	1.50s	
• Auditorium:	1.50s to 2.00s	

For detailed acoustic reports, check the product pages on our website: www.buzzi.space

BuzziBlinds Classic

— By Alain Gilles

Room divider

These rotating acoustical blinds take their inspiration from modernist architecture—more specifically from the exterior sunshades that can be found on modernist buildings designed by Oscar Niemeyer. The free-standing room divider is made up of a series of five rotating acoustic blinds. With a simple twist, the blinds can be opened or closed to varying degrees to create privacy or open-up space. This gives individuals the opportunity to determine the level of privacy they may want or need at any given moment to concentrate on a specific task.

BuzziBlinds

— By Alain Gilles

Acoustical performance and privacy with a twist
New additions to the BuzziBlinds Classic. The new generation of BuzziBlinds offers 4 different shapes of the fins covered with plain BuzziFelt. The innovative v-cut technique strengthens the architectural and minimal look. The rhythm and tonalities created by the orientation of the v-cut add a dynamic of depth to any space.

BuzziBlox

— By BuzziSpace Studio

Wall mounted or ceiling pendant acoustic panel

BuzziBlox is a group of acoustic panels with different depths, developed to tune a room in the speech spectrum range and especially in the low and mid frequencies.

By using alternating depths, the absorption of the different wavelengths into the thick layers of foam will be improved and make sure that the waves don't reflect into the room again. This diffusion effect will give the room a more pleasant sound experience. When placed against a wall, the Blox rather has the appearance of a piece of art while fully maintaining its initial purpose: to control and monitor the sound in any given room.

BuzziBrickBack Architectural

— by Sas Adriaenssens

A work of art

This architectural, sound-absorbing wall brings blank walls back to life. Made of multiple layers of sound-absorbing BuzziFelt in monochrome colors, this easy-to-install solution reduces high-frequency tones, while creating visual interest with its tactile, linear pattern. The versatile surface can also serve as a bulletin board to pin up memos, notes, photos and inspiration.

Dimensions

Panels can be mounted horizontally or vertically.

BuzziDesk FlipFlop

— by Alain Gilles

Free-standing desk divider screen

These movable and foldable acoustic screens have been designed in order to instantly define a quieter and more personal space on any desktop. They can be conveniently stored against a wall in a flat manner since their side flaps are fully movable. They can be used in a more or less closed manner depending on how protected one wants to be, but can also be set in a zig-zag manner on a table top.

They were originally designed to be used on the multifunctional BuzziPicNic table (with two small extra sliders that fit perfectly in its central opening), but they can be used on any tabletop to define a specific area when needed.

BuzziDish

— by Jeffrey Huyghe

A playful high-performance acoustic solution with rotating capabilities
Playful exterior, complex interior. BuzziDish marries design and function with the recognizable shape, reminiscent of a satellite dish. Featuring a fabric-upholstered body paired with a perforated structure and acoustic foam core interior, BuzziDish’s parabolic, concave design efficiently mitigates noise by absorbing undesired sound waves. With a rotating connector, attached to the back of the outside curvature, BuzziDish offers additional functionality and flexibility. Combine an array of panels and turn the body in different directions for added acoustic impact and visual interest—create something never seen before!

BuzziFalls

— by Sas Adriaenssens

An artful room divider in BuzziFelt

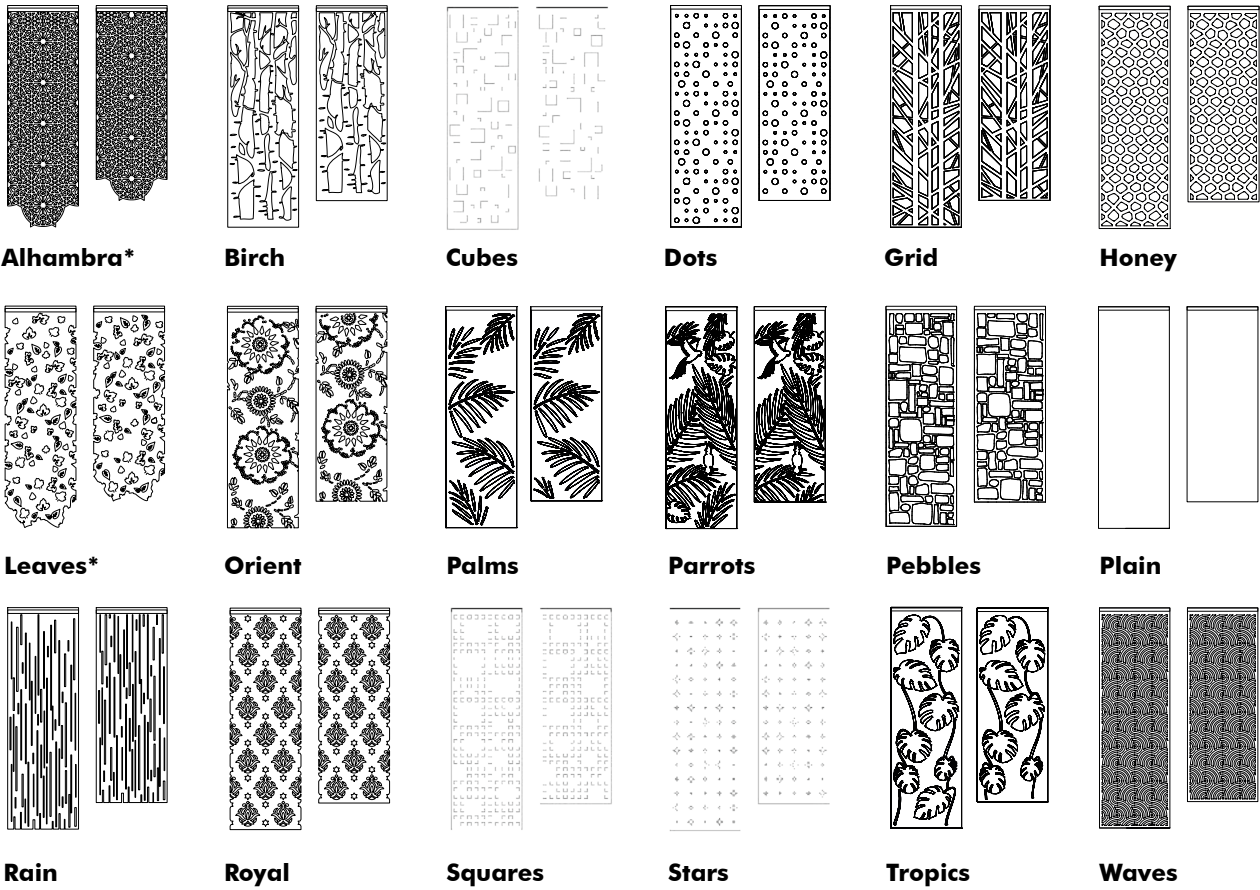

Partition a space and create a layer of privacy with BuzziFalls, a collection of floating, decorative panels, which offer artistic style with acoustic benefits. Designed to tackle the challenges unique to open-floor plan environments, BuzziFalls is an elegant art piece and room-dividing solution in one. Made of dual layer BuzziFelt, these sound-absorbing panels are precision cut with bold patterns, available in a range of organic, geometric and cityscape motifs.

The BuzziFalls Rail enables BuzziFalls to be slid with ease — creating movable room dividers that shift from private to public space. Running on a single three-meter track, panels slide from left to right. To create the effect of sliding doors, install two layers of parallel tracks for the rails. BuzziFalls can be attached directly to the surface of the track rail or suspended and exists in a black or white color.

BuzziGrid

— by Alain Gilles

Ceiling element in BuzziFelt

The BuzziGrid is a sound buffer that limits echo in a room. It takes its inspiration from the structures that have been widely used in the 60s and 70s to partially hide ceilings in public spaces. In this case the grid has been turned into a functional sound-absorbing product that can be used in meeting rooms, lobbies, or other public spaces to define areas.

BuzziKey Soft

— by BuzziSpace Studio

A playful acoustic panel attuned to modern spaces
BuzziKey Soft offers exceptional sound-absorption capabilities ensuring an acoustically well-balanced space that is never out of tune! The soft exterior and chamfered edges create an intriguing blend of contrasts that help break the hard surfaces and lines of a space. BuzziKey Soft lightens and softens walls all while upholding a sense of familiarity with the classic acoustic panel. It’s back to basics, yet attuned to modern spaces and interiors alike. Play with perspectives and add depth of field with different models, available in various sizes and depths, and choose your favorite color combinations for a distinctive look.

BuzziMood

— by Cory Grosser + Associates

Lift up your mood

Let your imagination run wild and create your own graphic wall art. BuzziMood is an acoustical wall solution that offers the possibility to combine materials found in nature with upholstered pads in a range of different fabrics and geometrical shapes. This blend mitigates noise and serves as a natural air humidity indicator too when mixed with moss panels. Choose between two moss colors, a light and dark green, to create varying degrees of contrast against the metal frames. As the name suggests, this acoustic solution will undoubtedly lift up your mood in any setting.

BuzziPleat

— by 13&9 Design

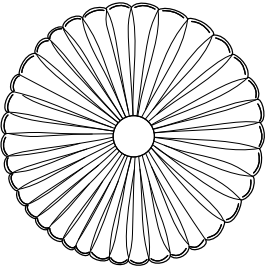

A series of architectural solutions by 13&9
The BuzziPleat delivers light and sound control with architectural edge. This series reinterprets ancient techniques used in fashion design, like smocking and pleating, to create large-scale, yet lightweight sculptural forms, made of sound-absorbing BuzziFelt.

Architectural folds maximize surface area, delivering exceptional acoustic performance. The hanging acoustic pendants can be configured with or without a light source, to marry sound control and illumination in one multi-purpose product.

BuzziScreen

— by Sas Adriaenssens

Sound-absorbing dividing screen

The folding screen has come back into fashion with a bang! The BuzziScreen is a contemporary take on the flexible room divider with all sorts of advantages. For example, it can be extended infinitely: the handy recycled zipper system makes it easy for you to add panels. Just like with other BuzziSpace products, you can pin objects, photos or letters to the screen, and of course it works as sound absorption as well. Divide your office or room however you want, wherever you want!

BuzziScreen Mix

— by Sas Adriaenssens

Sound-absorbing sound screen with different heights

The BuzziScreen Mix combines different heights and fabrics to vibrant effect. Alongside, the regular BuzziSpace fabrics (and select collections by Kvadrat) give a great edge to the end result. Add industrial zippers and this is not your average room divider, but a true designer piece. Of course, this room divider wouldn't be BuzziSpace if it didn't have acoustic qualities.

BuzziShield Desk

— by BuzziSpace Studio

Create private workstations

BuzziShield Desk is a voluminous desk partition that instantly creates private and snug workstations all while absorbing noise and adding visual privacy so focus work can be done. The lightweight and flexible acoustic solution features a thick upholstered body (7 cm/2.8") that's sturdy enough to sit on top of a desk by placing it on its metal feet or secure the acoustic solution to the edge of a desk with its unobtrusive fixes. Combine more than one BuzziShield Desk to define multiple workstations, or use them individually.

BuzziShield Free

— by BuzziSpace Studio

A cozy office divider
BuzziShield Free is unlike your usual room and office dividers and won't create a cold atmosphere as its glass or plastic counterparts do. Due to its voluminous upholstered body, this cozy office divider effectively absorbs sound while adding a colorful element into any workspace. The lightweight and adaptable BuzziShield Free works well on its own as a partition between desks to create private workstations for both seated and standing desks. Or combine more than one to introduce natural flows in an open space. Additionally, BuzziShield Free can also work in conjunction with BuzziShield Hook and BuzziShield Desk for that ultimate soft architecture look.

BuzziShield Hook

— By BuzziSpace Studio

Create snug environments without building walls
BuzziShield Hook is unlike your usual desk partitions and office dividers and won't create a cold atmosphere as its glass or plastic counterparts do. The lightweight and flexible acoustic solution not only helps to mitigate sound but also adds an unexpected design element within any workspace due to its 7cm /2.8" thick upholstered body and elegant curve. Combine more than one BuzziShield Hook to create snug areas for focus work, meetings, or collaborations to occur without having to build walls or partition it between desks to create private workstations.

BuzziSkin Printed

— by Sas Adriaenssens

Cheer up your walls with sound-absorbing wall cover
Customize your wall with BuzziSkin Printed and enhance the room acoustics at the same time. Made from sound-absorbing materials, this bold wall cover helps reduce high tones in a space, e.g., ringtones and typing sounds. The self-adhesive backing makes installation very easy while the tackable surface offers the possibility to personalize a space with notes and images. Easily brighten up corners and nooks with a pinch of creativity no matter the print you choose. Go with the marble print for a sophisticated look, the concrete for a more urban vibe or go wild with one of the green or camouflage prints—any of these will undoubtedly make your interior stand out!

BuzziTab Soft

— by BuzziSpace Studio

A chic reinterpretation of the classic acoustic panel
BuzziTab Soft is a playful acoustic treatment with exceptional sound-absorption capabilities. This chubby wall solution reinterprets the classic acoustic panel, suggesting that acoustics and design do pair. With its friendly appearance, well-rounded corners and edges, BuzziTab Soft breaks the hard surfaces and lines of a space. It lightens and softens walls—all while providing a retro look and feel. Play with perspectives and add depth of field with different models, available in various sizes and depths, and choose your favorite color combinations for a distinctive interior.

BuzziTotem

— by BuzziSpace Studio

Sculptural, freestanding acoustic pillar

Say hello to this playful, freestanding acoustic pillar, available in three models and a range of 3D statement patterns. No matter the model, the soft edges help diffuse sounds while the upholstered acoustic foam body absorbs sound in its entirety. Needless to say, BuzziTotem is one of our peak acoustic performance solutions. Easily fit this standing, architectural element into corners to trap sound waves in offices, residential settings, or hospitality areas.

BuzziTripl Cockpit

— by BuzziSpace Studio

An instant getaway

Crafted from three layers of our hero BuzziFelt, BuzziTripl Cockpit is designed to reduce noise so you can establish a quiet and private area for concentration. The acoustic solution is easy to install and can be placed on any existing workstation or communal table. Or position more than one BuzziTripl Cockpit near each other to form a Hub of Togetherness, so employees can work apart together all while maintaining social distancing. The flexible and lightweight BuzziTripl Cockpit can work as a simple add-on to any workspace destination including co-shared offices, libraries, airports, and even hotel lobbies. Additionally, a functional cutout at the back allows chargers to run through without any clutter, so you can keep your laptop and smartphone always powered.

BuzziTube

— by BuzziSpace Studio

Create different atmospheres

Looking to create a unique ambiance for various areas in your workspace, whether it be in a lobby, meeting room, canteen, or beyond? BuzziTube’s voluminous geometric design finds a perfect balance between a suspended acoustic ceiling panel and a work of art.

Due to its 3-dimensional, yet soft and delicate look, BuzziTube instantly elevates any modern residential or commercial space while absorbing excessive noise. The acoustic solution can be used as a standalone or combined with our BuzziJet family or any pre-existing lighting units to create a dynamic touch in any open space. BuzziTube arrives in four different diameters and sizes (S/M/L/XL) and can be upholstered in a wide range of fabrics and colors, making it easy to suit your needs.

BuzziZepp

— by Alain Gilles

A suspended, linear acoustic panel
BuzziZepp is an impressive, sound-absorbing panel offering acoustic treatment to a space. The suspended design was conceived by designer Alain Gilles as an “imaginary island” to visually delineate and bring a sense of tranquility to large open spaces. With its striking linear design, BuzziZepp hovers from above to define zones without obstruction, establishing a more intimate, quiet and purposeful sense of space—no vertical partitions or walls needed! The slim framework is made of upholstered acoustic panels, engineered to absorb sound and reduce echo.

Move your body, move your mind

BuzziBalance creates a non-traditional environment that brings people together, provoking joy and conversation. The BuzziBalance family offers both a seating and standing element.

While standing, BuzziBalance Board becomes a muscle activator. As one balances on the wooden-carved rocking board for a few moments, the mind and body are awakened. While sitting on the BuzziBalance, a rocking pouf in small and large version, the benefits of purposeful stretching are brought into the workplace. The upholstered seat also offers added acoustical benefits.

The perfect solution for creative hubs in the workplace, hospitality or residential homes. BuzziBalance offers the best of both worlds. Stretch your legs for a quick phone call or gather and rock away during a creative session.

BuzziBracks

— by Alain Gilles

A room within a room

BuzziBracks found its way to the drawing board to answer the need for flexible, new ways of working. In open spaces, this modular unit system can be combined in numerous ways to create different areas—to work, focus, relax or meet. The curtains, available in a wide color palette, act as a visual as well as an acoustic shield from the surroundings, separating one zone from the other. Combine transparent with non-transparent curtains and open or close them as needed for privacy. Be your own architect and continuously create and recreate microenvironments within open workspaces.

BuzziBooth

— by Alain Gilles

Upholstered temporary workstation

There has been a big shift toward working in open-plan offices that have a loft-like feeling of home. While there are many benefits, the challenge is maintaining space to make a phone call or work quietly and independently. Designer Alain Gilles' solution is the BuzziBooth: a phonebooth that dampens outside sounds. Now you can have a moment alone even in the noisiest of surroundings. Micro-architecture for maxi spaces!

BuzziCee

— by BuzziSpace Studio

Centre of attention
Contrary to traditional seating elements, BuzziCee features a symmetrical curved shape that allows colleagues to hold informal meetings or to sit together apart. The unique acoustic seating element is designed to be the ultimate focal point in your workspace and acts as the perfect spot for gatherings whether it be in an open-plan office, reception area, hospitality space, or beyond. BuzziCee’s striking design will instantly elevate your open area, all while absorbing excessive noise and creating a sense of togetherness.

BuzziDee

— BuzziSpace Studio

Versatile pouf with exceptional acoustic capabilities
A, B, C, BuzziDee. With this originally-shaped acoustic pouf in the room, you can speak out without worrying about disturbing coworkers thanks to the sound-absorbing capabilities. Featuring rounded corners on top and below, BuzziDee’s eye-catching curvature adds structural integrity for maximum comfort; meanwhile, its firm yet lightweight body makes it easy for users to rearrange or store away BuzziDee as needed, or pull up as extra seating in a meeting room or communal space.

BuzziHug

— by BuzziSpace Studio

A versatile privacy booth for the ever-changing workspace

BuzziHug perfectly balances between being a semi-enclosed privacy booth as well as an individual stand-up desk. Because of its voluminous upholstered body, BuzziHug effectively mitigates excessive noise while doubling as an unexpected design element within any workspace. With occupancy for one, the semi-enclosed acoustic solution instantly creates a cozy and safe working environment for employees to hold video calls or to get focused work done. Due to its lightweight and organic structure, combining more than one BuzziHug to divide open spaces and creating a visually stunning atmosphere while absorbing sound is simple. Additionally built with a sturdy core, BuzziHug can also be bolted to the ground to prevent it from falling over during earthquakes and seismic shocks.

BuzziMe

— by Axel Enthoven

Lounge Chair

Me, myself and I: there are times when you want to spend some time on your own in peace and quiet. BuzziMe is the ideal space to get away from it all. Belgian designer Axel Enthoven was responsible for an ingenious look that harmoniously combines functionality and ergonomics. Put two BuzziMe lounge chairs together for a private meeting. The acoustic absorption of the lounge chair reduces any external noise and vice versa: the perfect chair for lobbies, airports and offices - or your very own 'quiet' cocoon at home.

BuzziNest

— by BuzziSpace Studio

Silent workspaces anywhere

BuzziNest Booth and Pod are great alternatives to expensive infrastructure and all you need to erase distracting noise from any workplace. The compact and mobile acoustic privacy Booth for one offers a private space to work and take calls, while BuzziNest Pod allows up to four people to hold face-to-face meetings and collaborations in any open space without disturbing others, and most importantly, being disturbed. Because of its luxe upholstered exterior and fabric panels on the interior, BuzziNest effectively dampens sound from every direction to create maximum peace and quiet for everyone in the office, whether you are working inside BuzziNest or out. A range of customizations and furniture add-ons are also available for BuzziNest.

BuzziSpark

— by Alain Gilles

A private meeting space

BuzziSpark invites you to relax and observe in silence what happens in your surroundings. But it holds a surprise... Until you plunge yourself in its cocoon, you won't know 'who' or 'if' someone is sharing the same experience. You may run into another nomad with another story looking to escape from the everyday and make a new connection. The magic of BuzziSpark lies in the allure of the unknown – the surprise of not knowing who you'll meet around the corner.

BuzziFloat

— by Alain Gilles

A minimal chair to maximize space

BuzziFloat is an intentionally simple design that blends into its surroundings. This transparent chair is engineered to feel spacious and airy and has a strong graphic personality. BuzziFloat is offered in multiple finishes: non-upholstered or upholstered with an elegantly cushioned seat and backrest. The bent plywood back support aligns perfectly with your tabletop. BuzziFloat fits perfectly together with BuzziPicNic tables in office settings, residential homes, and hospitality areas.

Finishes

Shell in Ash White Wash or Ash Black Stained - plain or with upholstered cushions in fabric collection CAT A, B, C, D, E, F, Leather (Check our application overview p. 346)

BuzziJungle

— by Jonas Van Put

Vertical conversation tower
Inspired by nature, BuzziJungle offers a solution to the conventional meeting space. The launch of the BuzziJungle introduced the design world to young Belgian talent Jonas Van Put. This is Van Put’s first project with a major international manufacturer. BuzziJungle is BuzziSpace’s reflection of their vision for the social office and further pushing the traditional boundaries of the workplace.

Various elements within the structure provide an opportunity for different interactions within the “jungle”. You can climb, lounge and meet in the elevated work-lounge space made from powder coated steel. The BuzziJungle creates an urban footprint in large and small spaces.

BuzziMilk

— by Alain Gilles

A classic milk stool

This rustic-meets-modern take on the old farmhouse favorite would even make your grandma feel nostalgic. BuzziMilk is a sturdy little stool inspired by elements not usually found in a standard office space. Its goal? Create a warm and homey feeling at work.

BuzziMilk has four legs and an upholstered seat for a softer experience. Select from a variety of wood finishes and make it your own by pairing with one of our many BuzziSpace fabrics. Whether you choose a bold pop of color (red, yellow, green, white and blue) or a natural neutral, it is designed to stand on its own or match the BuzziPicNic table.

Looking for a pure wood stool? BuzziMilk Stool AllWood is pure simplicity and strong design.

BuzziMirage

— by Alain Gilles

The Art of Illusion

BuzziMirage is about reflections, false perspectives and fake shadows. The mirrors act as a “trompe l’oeil” since they are based on false impressions and confused perceptions. “It’s a discussion between materials, reality and virtuality. But, above all BuzziMirage is about creating a little world of its own,” says designer Alain Gilles. The offset between the arch-shaped mirror and its support creates a sense of depth and false impression that a door or window is open. The design combines various materials —a metal or wooden arched frame, paired with a glass mirror— to play with depth and light, creating new vanishing points.

BuzziNordic ST600

— by Ståffan Thomsen

Gather in style

For the design and furniture lovers out there, BuzziNordic ST600 features a modern take on Scandinavian influences. Ideal for creating Hubs for Togetherness, this Nordic style table is the perfect spot to gather for meetings, work, study, and brainstorming. But it doesn't end there. BuzziNordic ST600 can easily substitute mundane dining tables for both the residential and hospitality environments while suiting many different interiors.

BuzziNordic ST600's sleek and minimalist design is constructed from 100% PEFC-certified wood and arrives in either luxurious Ash Natural or Ash Black Stained; both finishes allow the table's wood characteristics to remain visible. Over time, BuzziNordic ST600 will age beautifully and will remain a talking point for the years to come.

BuzziDome

— by BuzziSpace Studio

Temple of silence
BuzziDome is a modern acoustic light distinct for its refined dome shape. BuzziDome’s concave design, coupled with its acoustic foam element, acts as an excellent diffuser and absorber of sound. Therefore, BuzziDome provides exceptional acoustic treatment for open-plan settings. A recessed LED light source, paired with its tailored design, accentuates the pendant’s meticulous craftsmanship while also emitting a warm, functional light. BuzziDome accommodates the demand for both sound absorption and light, being the perfect fit for open-plan workplaces, hospitality settings, and break-out areas. Pick yours from a wide range of colorful upholstery options. It will definitely complement the aesthetic scheme of your interior.

BuzziFez

— by BuzziSpace Studio

A playful lighting accessory

BuzziFez is our first table lamp inspired by our beloved range of acoustic lighting solutions. But don't let its size fool you. The lighting accessory houses an energy-efficient and dimmable LED module that provides tactile warm lighting and perfectly suits office, home, and hospitality environments. The playful table light features a tiltable cylindrical-shaped head made from our signature BuzziFelt material that can be customized in either Anthracite, Stonegrey, or Offwhite, while the inner layer of fabric is colored in Ivory to ensure optimal light reflection. Embellishing BuzziFez are sturdy glossy black push bottoms and beautifully detailed edges, giving the decorative lamp a modern and elevated twist. Easily combine BuzziFez with other products in our portfolio, such as our range of tables and workstations, to effortlessly spruce up various workspaces. All you need to do is unbox, plugit in, and enjoy!

BuzziHat

— by Alain Gilles

Say goodbye to noisy environments

A decorative and highly recognizable hat-shaped pendant light with excellent sound absorption capabilities. Its unique design, combining an upholstered part with a metal shade is bound to steal the attention in any space. The upholstered foam body is available in a wide palette of color and fabric combinations, while the metal shade and ring come in 4 finishes (black, white, beige red and gold). Mix colors of your choosing and match the fabric of BuzziHat with the color of your furniture to create an impeccable setting. BuzziHat is available in different sizes to fit different noisy environments which makes it the ultimate acoustic lighting for any office, lobby or restaurant that needs acoustic absorption treatment combined with high-quality lighting.

BuzziJet

— by BuzziSpace Studio

Powerful acoustic circle of light

Form follows function with BuzziJet, an intentionally simple design based on the principles of geometric acoustics. Available in three different diameters, this cylindrical design allows sound waves to bounce back-and-forth within the radius of its circular body, and in turn, mitigates noise. Despite its size, BuzziJet is lightweight and airy due to its upholstered foam core. Its soft presence evokes a majestic sense of serenity, while concealed inside its body, a powerful light source emits warm, pleasant light.

BuzziPleat Light

— by 13&9 Design and BuzziSpace Studio

A series of architectural solutions
BuzziPleat delivers sound control with an architectural edge. This series reinterprets ancient techniques used in fashion design, like smocking and pleating, to create large-scale, yet lightweight sculptural forms, made of sound-absorbing BuzziFelt. Architectural folds maximize surface area, delivering exceptional acoustic performance. Combine the hanging acoustic pendants with a light source to marry sound control and illumination in one multi-purpose product, BuzziPleat Light.

Aerodynamic noise regulating light

BuzziProp’s aerodynamic design offers sound-absorbing capabilities, delivering acoustic comfort paired with a warm ambient light. BuzziProp Small is perfect for individual tables, while BuzziProp Beam works well in larger collaboration spaces, meeting rooms, and reception areas. BuzziProp Small can be fitted with BuzziSol Solo in either a glass globe for a decorative effect or a reflector spot for more direct lighting. The larger BuzziProp Beam can house BuzziSol Trio in your choice of Spots or Globes. For a more dynamic look, mix and match BuzziProp Small and BuzziProp Beam in various colors and fabrics. Both BuzziProp Small and BuzziProp Beam are specifically designed to absorb high-frequency sounds such as ringtones and noise from chatty colleagues.

BuzziShade

— by BuzziSpace Studio and Stal Collectief

A sound-absorbing lighting fixture in BuzziFelt
BuzziShade’s design prevents eavesdroppers from hearing your private conversations and reduces external noise levels to a minimum. BuzziShade’s versatility makes it a fantastic addition to any office, waiting room, or restaurant and is designed with large-scale settings in mind. Be creative by adding a layer of colorful fabric to BuzziFelt shades.

BuzziShade Square

— by BuzziSpace Studio and
Stal Collectief

Noise-reducing pendant lighting with a twist
Meet BuzziShade Square with its unique personality. It combines a nicely finished metal frame, upholstered in BuzziFelt, with our signature lacing available in a wide range of colors. This meticulously crafted lighting fixture, with acoustic capabilities, reduces external noise level to a maximum while blending in with the interior. It is such a versatile modern lighting that means the perfect addition to any office, lobby area or restaurant. Be adventurous and hang several square pendants in a row for an even more distinctive setting and well-balanced space.

BuzziShade Standing

— by BuzziSpace Studio and Stal Collectief

Floor lamp in BuzziFelt

BuzziShade Standing offers decorative lighting and reduces external noise levels to a minimum. BuzziShade is extremely versatile. This floor lamp is an ideal add-on to any waiting room, hotel lobby or even at home to create that perfect hideaway. BuzziShade is the culmination of an artistic collaboration between BuzziSpace and the four young Belgian furniture designers of Stal Collectief.

BuzziSol

— by BuzziSpace Studio

Shine bright
BuzziSol is a versatile and straightforward pendant light fixture that can be fitted with either a frosted glass globe for ambient setting or with a reflective spot for direct lighting. Choose BuzziSol Solo for smaller settings or add a BuzziSol Trio or BuzziSol Quintet variation for larger gathering spots and collaboration areas. Because of BuzziSol’s demure design language, it can work on its own to create modern and minimalist spaces. Or pair it with some of our acoustic lighting solutions such as BuzziPleat, BuzziShade, BuzziProp Small, BuzziProp Beam, and BuzziZepp.

BuzziTrom

— by BuzziSpace Studio

Functional Lighting with acoustic abilities
BuzziTrom is the first functional acoustic lighting solution crafted from a dual layer of felt to join our lineup that works on speech and high-tones. Along with an integrated LED disk, this acoustic lighting pendant houses an enclosed 4 cm air cavity that ensures maximum acoustic performance. Its cylindrical design traps sound waves within the radius of its frame; meanwhile, the exterior helps to diffuse sound energy.

BuzziTrom features sturdy glossy bronze push buttons, giving the lighting option a modern twist. To add a playful touch, go for a bicolor variation, or keep things simple with a monotone outfit. BuzziTrom comes in three different sizes to suit your space. Choose from S to L.

Models

BuzziZepp Light

— by Alain Gilles

An island of light
BuzziZepp Light doubles as a sound-absorbing panel and can be paired with either our LED line and both Globe or Spot iterations of BuzziSol Trio and BuzziSol Quintet. Discover the different additions to perfect your atmosphere while ensuring your space has minimal echo and adequate lighting. Opt for the dimmable LED line for more functional settings and to brighten up workstations. For a more decorative feel, BuzziSol Trio and BuzziSol Quintet Globe will create a more relaxed aura, while BuzziSol Trio and BuzziSol Quintet Spot provide direct light on a surface. No matter which BuzziZepp Light variation you choose, it will hang perfectly above a large meeting or collaboration table. On top of that, BuzziZepp can be outfitted in various fabric and color combinations, making it a breeze to combine it with other furnishings in your existing space.

OUTDOOR

BuzziBreeze

— by BuzziSpace Studio in collaboration with Cassecroute

Outdoor workstation
BuzziSpace has always had a penchant for picnics, which is why it created the BuzziPicNic. This award-winning indoor table has all the nostalgic design features of a traditional picnic table. Our love of outdoor living inspired our designers to create BuzziBreeze, answering the call for an outdoor workstation that captures the collaborative needs of the modern workplace. BuzziBreeze is constructed using a powder coated metal frame, with the top and seat in weather-resistant hardwood or aluminum.

Models

BuzziNordic ST900

— Stäffan Thomasen

Outdoor zen
Vintage-inspired furniture should not be limited to the indoors. The BuzziNordic ST900 Collection gives you the opportunity to upgrade your outdoor space with a Scandinavian look and feel. Choose among several models; a single armchair, a matching ottoman and a daybed, all built on a frame of solid hardwood, suitable for the outdoors. Each style is outfitted with upholstered cushions in a variety of outdoor weather-proof fabrics, so you can choose to enjoy the open air year-round.

BuzziShed

— Jean-Pierre Galeyn and
BuzziSpace Studio

Outdoor shed

While working outside might seem nice, the lack of comfy furniture and the glare of the sun on your laptop or smartphone screen might cause a lot of discomfort. Until now. With the launch of the BuzziShed, designed by Jean Pierre Galeyn and BuzziSpace Studio, you can now work or spend time outside in this stylish outdoor shed, protected from sunlight and even from the rain. The BuzziShed can also be used as a garden shed on cool or rainy days or to create meeting points in a large open space.

WOOD

- ASH BLACK STAINED
- ASH WHITE WASH
- OAK
- WALNUT
- ASH NATURAL
- ASH WALNUT STAINED
- CUMARU
- IROKO
- ANTWERP OAK
- ASH LACQUERED
- HPL
- WHITE LAMINATE

Ash Black Stained

Properties Black clear coating with a matt look, consisting of a durable finish, suitable for furniture, that masks normal wear and leaves the wood grain visible to the eye.
Maintenance First, wipe the surface with a dry cloth then clean carefully with a damp cloth. Do not use any abrasive cleaning products or scourers as this can damage the surface.

Ash White Wash

Properties Oil based coating with white pigments consisting of durable finish, suitable for furniture, that masks normal wear and leaves the wood grain visible to the eye.
Maintenance First, wipe the surface with a dry cloth then clean carefully with a damp cloth. Do not use any abrasive cleaning products or scourers as this can damage the surface.

Oak

Properties Clear coating with a matt varnish look, consisting of a durable finish, suitable for furniture, that masks normal wear and leaves the wood grain visible to the eye.
Maintenance First, wipe the surface with a dry cloth then clean carefully with a damp cloth. Do not use any abrasive cleaning products or scourers as this can damage the surface.

Walnut

Properties Clear coating with a matt varnish look, consisting of a durable finish, suitable for furniture, that masks normal wear and leaves the wood grain visible to the eye.
Maintenance First, wipe the surface with a dry cloth then clean carefully with a damp cloth. Do not use any abrasive cleaning products or scourers as this can damage the surface.

Ash Natural

Properties Clear coating with a matt varnish look, consisting of a durable finish, suitable for furniture, that masks normal wear and leaves the wood grain visible to the eye.
Maintenance First, wipe the surface with a dry cloth then clean carefully with a damp cloth. Do not use any abrasive cleaning products or scourers as this can damage the surface.

Ash Walnut Stained

Properties Oil based coating with walnut colored pigments consisting of durable finish, suitable for furniture, that masks normal wear and leaves the wood grain visible to the eye.
Maintenance First, wipe the surface with a dry cloth then clean carefully with a damp cloth. Do not use any abrasive cleaning products or scourers as this can damage the surface.

Note color deviation may occur.
Find the latest update of the material specifications and colors on our website: www.buzzi.space
Refinishing In the event that scratching or marring has occurred we recommend that refinishing be carried out by a professional furniture refinishing company.

Cumaru

Properties Tropical hardwood which is more resistant to weather influences. No oil or varnish is applied. In normal use, wood will turn grey over time.
Maintenance Aftermarket teak cleaning product can be used for yearly maintenance to freshen up the wood after winter. Do not use any abrasive cleaning product or scourers as this can damage the wood. Cumaru wood is naturally durable but may be prone to movement and cracking in outdoor environments.

Iroko

Properties Tropical hardwood which is more resistant to weather influences. Oil based coating with white pigments consisting of durable finish, suitable for furniture, that masks normal wear and leaves the wood grain visible to the eye.
Maintenance First, wipe the surface with a dry cloth then clean carefully with a damp cloth. Do not use any abrasive cleaning products or scourers as this can damage the surface. Note: Iroko wood is naturally durable but may be prone to movement and cracking in outdoor environments.

Antwerp Oak

Properties Oak Solid wood with a subtle rustic look, allowing some pith and small cracks. Oil based coating with white pigments consisting of durable finish, suitable for furniture, that masks normal wear and leaves the wood grain visible to the eye.
Maintenance First, wipe the surface with a dry cloth then clean carefully with a damp cloth. Do not use any abrasive cleaning products or scourers as this can damage the surface.

Ash Lacquered

Blue
PANTONE 299 C

Green
PANTONE 370 C

Red
PANTONE 185 C

Yellow
PANTONE 115 C

White
PANTONE 000 C

Properties Lacquered coating with matt look, leaving a visual woodgrain.
Maintenance First clear the surface with a dry cloth, then clean with a slightly damp cloth. Do not use abrasive cleaning products nor scourers, they can damage the surface.

Refinishing Renovation should be done by a specialist in furniture coating. It requires sanding of the parts and re-applying an equal amount of coating on all sides.

White Laminate

Properties HPL top layer with plywood core and straight oiled visible plywood edge
Maintenance Depending on the stains/dirt there are different prescriptions:
LIGHT: dry or damp paper towels, a cloth or sponge.
NORMAL: with a cloth or soft nylon brush and washing powder, soft soap, toilet soap or washing-up liquid. If necessary, leave for a while and then rinse thoroughly with clean water.
HEAVY: Discoloration stains through long exposure to tea, coffee, etc. use washing powder and household bleach (but do not repeat too often). For stains such as lead pencil, felt-tip pens, marker and ball-point pens use an organic solvent for example acetone (nail varnish remover).

Properties Fine-textured powder coated steel or aluminum with a matt look.
Maintenance Clean as needed using a soft cloth or brush with a mild detergent. Avoid steam cleaning, abrasive cleansers, carbon steel brushes/wools and cleaners containing chlorine.

Uncoated Aluminum

Properties Bare aluminum with clear coating.
Maintenance Clean as needed using a soft cloth or brush with a mild detergent. Avoid steam cleaning, abrasive cleansers, carbon steel brushes/wools and cleaners containing chlorine.

Galvanized Steel

Properties Hot-Dip Galvanization > applying a protective coating layer to prevent corrosion of the metal part.
Maintenance Clean as needed using a soft cloth or brush with a mild detergent. Avoid steam cleaning, abrasive cleansers, carbon steel brushes/wools and cleaners containing chlorine.
