# LED

## MINDBOGGLING TRANSFORMATIONS ARE AFOOT IN THE WORLD OF ILLUMINATION, WHERE A NEW LED UNIVERSE IS BEING CREATED

Brighter, flatter and cooler light sources that use a fraction of the energy have suddenly become affordable and trusted by consumers everywhere.

In 2019, we are introducing the latest in high performance LED technology to our expanding lighting range. A custom-made Tom Dixon LED ring and driver module has been integrated into our existing best seller Melt and launches into two new collections, Spring and Opal. The LED module offers the three key benefits expected of this technology - longer LIFE expectancy, ENERGY efficiency and improved PERFORMANCE resulting in more functional, flexible and convenient products.

Our integrated LED module is fully serviceable and replacement LED rings and drivers are available if needed. However, with a life span of 50,000 hours, if used on an average of 6 hours a day, you should not need to replace for over 20 years.

# SPRING

## ILLUMINATING FLAT-PACKED SPRING PENDANT LIGHTS

SPRING is a series of three pendant lamps made up of stainless-steel strips. Pliant ribbons of stainless steel have been arranged like a whisk around our custom-made Tom Dixon LED.

The semi-transparent shape thus created can be adjusted to a variety of silhouettes - from a flat arrangement reminiscent of a spirograph drawing, to a flying saucer configuration and on to a fuller shape akin to a pumpkin.

The shades are made from multiple bands of high-performance spring steel plated in an attractive white or brass finish. This engineering material has memory and dictates the form of the final shade. The nature of the spiral design allows the voluminous shades to be easily flat-packed for transportation.

# OPAL

## ILLUMINATING, SOFT AND NEUTRAL AESTHETIC

OPAL is a family of translucent globes using our own custom recipe of tinted white opalescent polycarbonate. Semi translucent, they maintain an ethereal ghostliness in the daylight and at night form a perfectly illuminated sphere. Coupled with our new Tom Dixon LED, the OPAL range emits a soft, diffused and flattering light. The softness of the lightbulb shape is achieved through a blow-moulded custom combination of opalescent plastic. This process works to achieve an organic form as well as a delicate translucency.

# MELT LED

## CRUSHED BY FRONT

Our bestseller, MELT is evocative of molten glass, the interior of a melting glacier or images of deep space. An imperfect, organic and naturalistic light that produces a mesmerizing melting hot-blown glass effect. MELT is now available in a new size and with custom-made Tom Dixon LED ring and driver module.

# SWIRL

**A MYSTERIOUS NEW MATERIAL THAT  
RESEMBLES 3D MARBLED PAPER, YET  
HAS THE WEIGHT OF STONE**

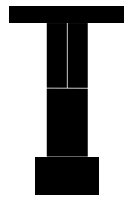

SWIRL is a series of geometric forms stacked upon one another to create multi-dimensional, functional sculptures. The unique process involves recycling the powdered residue from the marble industry, mixed with pigment and resin to create blocks of material that can then be sawn, sliced and turned on a lathe. SWIRL will inject a fresh pop sensibility into any setting.

# SLAB CHAIR & TABLE

## SOLID & SKILLED WOODWORK

When we decided to design a dining chair that sat comfortably with the SLAB range, we wanted something humble but with personality, modern yet looking like it had always existed, familiar yet unique – and on top of that stacking and comfortable!

So, it took us a long time, as that turned out to be a particularly challenging brief. But we think we have cracked it with this chair that can sit proudly in many environments – an honest piece of skilled woodwork.

The SLAB long table joins the family this year; a 2.4m table available in natural, black and fumed lacquered finish.

# TEXTILES

Our 2019 theme Monochrome threads through to our new fabric selection. We have refined and simplified our range to include a collection of leathers, suedes, wools, velvet, linen and sheepskin from specialised textile houses; Kvadrat, Designers Guild, Bute, Sørensen Leather and The Organic Sheep to ensure we bring uncompromising quality to our upholstery.

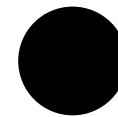

# PRIMAVERA

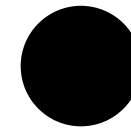

## ICE GREEN JADE FIGURING

Hidden between the deep gorges and snow-capped peaks of Yunnan's majestic landscapes, our oriental marble is quarried. An area that is rich in natural resources, the south-west province has the largest reserves of tin, lead, zinc and aluminium in China. Bordering Tibet, Myanmar, Laos and Vietnam, Yunnan province has the most diverse plant life in China.

Named Primavera but often described as a black, green and white metamorphic conglomerate, the marble is unusual due to its extreme random figuring and bold pattern. The alternating bright green, which is ground with white inlays and thin black veining ensures that each table top is completely unique.

# TUBE

Tube is a versatile and elegant table base made from brass plated tubing. Available in brass and a new black finish, Wide and High sizes join the Tube family, creating variation in height, dimension and weight. Tube is a sophisticated and sturdy table component that can be customised.

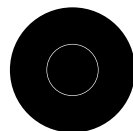

For our range of table top options to pair with TUBE, please visit [tomdixon.net](http://tomdixon.net)

# BEAT

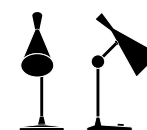

BEAT is a series of lights in six distinctive pendant shapes, inspired by the sculptural simplicity of traditional Indian water vessels. The BEAT family is available in four finishes - black, grey, brass and now white, all featuring a warm interior of beaten brass or silver plate.

# FELT

The FELT shade provides warmth to any space in both lightness and texture. Available in two different designs, pendant and floor light, FELT contrasts to the abundance of metal and plastic lights available in the market. Made from double layered felt, which is heat pressed into a soft organic shape, it features a grey exterior with a white interior and now an all-white finish.

# FLASH

FLASH is a series of sophisticated tables with an uncompromising metallic surface. Available in brass and now black, the mirrored glass top and iron base form a table that is simultaneously sturdy, sleek and reflective.

# PYLON

Originally created on a self-propelled mission to design the world's lightest metal chair, Pylon was made in a small series in Dixon's metal workshop in the early 90's. The lattice work of 3mm diameter steel rod is triangulated for maximum strength – an exercise in pure unadorned structure.
